DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: directed to a ball game system having a ball feeder, best seen in Figure 1A.

Species II: directed to a ball game system including a resilient surface adjacent one or more deformable elastic surfaces, best seen in Figures 2A, 2B and 3.

Species III: directed to a ball game system including a plurality of playing areas and a plurality of sensors, best seen in Figure 4.

Species IV: directed to a ball game system including a plurality of playing areas and one or more ball feeders, best seen in Figures 1A and 5A.

Species V: directed to a ball game system including a plurality of playing areas, a resilient surface adjacent one or more deformable elastic surfaces and means for adjusting the elasticity of rebounds, best seen in Figure 5B.

Species VI: directed to a ball capture and feed system, best seen in Figure 5B.

Species VII: directed to a ball game system including a planar playing surface, best seen in Figure 1A.

Species VIII: directed to a ball game system including a plurality of playing surface and a means for controlling usage of the hoop and playing areas, best seen in Figures 1 and 5A.

Species IX: directed to a ball game system including a planar playing surface, a plurality of sensors and means for controlling the operation of the sensors, best seen in Figure 4.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to John Hamilton on 27 June 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

It should be noted that the drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. It is not sufficient to merely identify the various features by arrows or circles. No new matter should be entered. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitra Aryanpour whose telephone number is 571-272-4405. The examiner can normally be reached on Monday - Friday 10:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Vidovich can be reached on 571-272-4415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
